### **Editor's Note:**

There was, at the 1963 Convention of the American Cleft Palate Association, a symposium entitled *Expansion Prosthesis and Bone Grafting*. The symposium consisted of five papers and two discussants. Because the topics are of great current interest to members of the Association, those papers and the papers of the discussants are being published in the *Cleft Palate Journal*.

A minimum of editing has been performed in order to retain the original intent and flavor of the presentations.

Four of the papers from the panel were published in the January 1964 issue of the *Journal*. The fifth paper, the discussants' papers, and the resulting commentaries appear on the following pages in this issue.

The Editors invite readers to comment either on these topics or about the specific papers in the form of letters to the Editor.
