International Craniofacial-Cleft Palate Bibliography

Copyright © 1986 The American Cleft Palate Association, The Cleft Palate Journal is a quarterly publication of the American Cleft Palate Association. It appears in January, April, July, and October and is produced by B.C. Decker Inc., 3228 South Service Road, Burlington, Ontario, Canada L7N 3H8. Second class postage is paid at Pittsburgh, Pennsylvania, and at additional mailing offices.

Postmaster: Send address changes to The Cleft Palate Journal, 331 Salk Hall, University of Pittsburgh, Pittsburgh, Pennsylvania 15261.
HONORS OF THE AMERICAN CLEFT PALATE ASSOCIATION
PRESENTED TO D. RALPH MILLARD, M.D.

D. Ralph Millard, Jr., M.D. (left) is shown receiving the Honors of the American Cleft Palate Association from James A. Lehman, Jr., M.D. (center) and outgoing President George Chierici, D.D.S. (right). (Photograph courtesy of O. Garcia)

The Honors of the American Cleft Palate Association are presented to those rare individuals whose record of service and pioneering accomplishments have significantly advanced the management and treatment of patients with cleft lip and palate. The Honors and Awards Committee, chaired by Robert Mason, Ph.D., D.M.D., was pleased to recognize the accomplishments of D. Ralph Millard, Jr., M.D. in the field of cleft lip and palate surgery and to bestow upon him the Honors award during the 42nd Anniversary Meeting Luncheon in Miami. The presentation was made by James Lehman, Jr., M.D.

Dr. Millard is the Light-Millard Professor of Plastic Surgery and Chief of the Division of Plastic Surgery at the University of Miami School of Medicine. He is internationally recognized for pioneering work in cleft lip and palate surgery. The rotation advancement technique, which he developed in Korea, was presented in Stockholm in 1959 at the First International Congress of Plastic Surgery. Since then he has developed the island palatal flap, approaches to the cleft lip nasal deformity, and the primary fork flap for the repair of bilateral clefts. Recently he has refined the approach to the bilateral cleft into a two-stage procedure to close the lip and lengthen the columnella. His three-volume text, Cleft Craft, is a compendium of the development of cleft lip and palate surgery and is considered the primary surgical reference text for cleft lip and palate.
