EDITORIAL

The Cleft Palate Journal is making two changes to the style and form of the reference lists as of January 1988. Inclusive pagination (i.e., first and last pages) will be used in the citation of journal articles and book chapters. Your cooperation in providing this information in all manuscripts submitted for publication is requested. The second change involves moving the year of publication to follow the list of authors and placing it in parenthesis. Examples are as follows:

Swarts JD, Rood SR, Doyle WJ. (1986). Fetal development of the auditory tube and paratubal musculature. *Cleft Palate J*; 23:289-311.

Tulasne JF, Tessier PL. (1986). Results of the Tessier integral procedure for correction of Treacher Collins syndrome. In: Marsh JL, ed. Long-term results of craniofacial surgery. Pittsburgh: The American Cleft Palate Association: 40-49.

We are also resuming publication of key words in order to assist readers who index journal articles on their personal computers. Submitted manuscripts should include a short list of words that reflect content.

Ralph L. Shelton, Ph.D.

Peer review is the backbone of any scientific journal. *The Cleft Palate Journal* is indebted to the following consultants for their expertise and effort in reviewing manuscripts and preparing reviews this year:
